MUHAMMAD NAZIM ALI

Software Developer | Python · PHP · SQL · REST APIs · AI-Assisted Development

Karachi, Pakistan | 03478399828 | nazimalionline@gmail.com | linkedin.com/in/mnazimali | github.com/NazimAli28

SUMMARY

Software developer with a BS in Software Engineering and 3+ years in a professional development environment. Designed and shipped 3 internal applications end to end, two role-based PHP/MySQL business systems and a Python bot integrated with the Trello REST API using Generative AI coding assistants to build faster. Completed the Stanford / DeepLearning.AI Machine Learning coursework; seeking a trainee role on an R&D team to grow into AI-driven software engineering.

PROFESSIONAL EXPERIENCE

Quixotic Creatives, Web Developer 01/2023 – Present | Karachi, Pakistan

- Replaced the sales team's shared spreadsheets and Google Forms with one controlled system used by 50 staff across 4 user roles by designing and developing **SalesHub**, a PHP/MySQL web application with 6 data modules and a maker-checker approval workflow that reviews every sensitive change before it goes live.
- Automated performance tracking for 12 designers, calculating points instantly on task completion instead of manually, by building **TeamHub**, a role-based task system with live timers, 8 JSON API endpoints, and Chart.js dashboards that analyse per-employee performance data.
- Reduced order look-ups to a single chat command for the operations team by developing **OpsBot** in Python, a Discord bot with 9 slash commands that integrates the Trello REST API and uses SQLite to recover reminders missed while offline.
- Owned requirements, database design, development, and code review across the SDLC for 3 internal applications, using Generative AI / LLM coding assistants to speed up delivery.
- Protected employee and client data across 2 web applications by enforcing secure coding practices: prepared statements, bcrypt password hashing, and session-based role access control.
- Delivered and maintained 20 WordPress and WooCommerce websites by configuring existing themes and plugins, implementing requested functionality, and troubleshooting technical issues.

SKILLS

- **Languages** — Python, PHP, JavaScript (ES6+), SQL, HTML5, CSS3
- **Backend & APIs** — REST API integration, JSON/AJAX endpoints, discord.py, PHP sessions
- **Databases** — MySQL / MariaDB, SQLite, relational data modelling
- **AI & Machine Learning** — AI-assisted development (Generative AI / LLM coding assistants); ML fundamentals — regression, classification, neural networks (coursework)
- **Practices & Tools** — SDLC, role-based access control, secure coding, code review, Git, GitHub, XAMPP
- **CMS** — WordPress, WooCommerce
- **Currently Learning** — React.js, Node.js, Express.js

EDUCATION

Ilma University, Bachelor's in Software Engineering 08/2021 – 06/2025 | Karachi, Pakistan

COURSES

Machine Learning Specialization (3 courses), Stanford Online & DeepLearning.AI, Coursera 11/2024 – 01/2025

Kaggle Learn 11/2024
Intro to Machine Learning · Intro to Deep Learning · Computer Vision

LANGUAGES

Urdu — Native/Bilingual

English — Proficient
